

Your Industry Leading Partner **Supporting Corporate Relocation**

With over 30 years of experience, RLI reduces the barriers for people going on assignments to other countries. We provide a full solution package to support relocation success.

360° support for relocation

Without a strategic support plan in place, relocations can become very costly when they don't work out. Depending on the level and position, studies cite the cost of unsuccessful relocations to range between \$65,000 to a million USD*. And, of course, there are also long-lasting impacts on productivity and employee wellbeing.

We help to mitigate those situations by not only considering the assignee's needs, but also any partner and children in the relocation support plan. By doing this we support partners who experience isolation or exclusion in their new country causing difficulties with settling. We also assist children, whose academic and developmental success is at risk due to relocation to a new school environment, new culture, and new language. Therefore supporting the whole family under one program.

*Relocating Partner Survey, EY, 2018

A streamlined process, improving success rates

If the assignee's family are supported and happy in their new environment, the risk of assignment failure is greatly reduced. How we enable this:

- A holistic, all-round approach to relocation.
- A fully-supportive, streamlined process – with educational relocation solutions all in one place.
- Our innovative offering will contribute towards several relocation and pre-departure needs, reducing lengthy processes and the number of agencies involved.
- Any potential risks are identified as early in the process as possible.
